

FLEX-LOK STEP INSERT

A series of polypropylene inserts for the purpose of securing steps in the wall of a precast concrete manhole or other concrete structure.

BENEFITS:

- Placement of insert is done at the time of manufacture.
- Concrete wall remains watertight.
- Guaranteed alignment and projection of steps.
- Precise hole to accept step shank.
- Interference fit makes installation of step rapid and simple.
- Polypropylene offers excellent chemical resistance.

SPECIFICATIONS:

- Insert meets the requirements of ASTM C-478 section 16.
- Exceeds the performance test procedures of ASTM C-497 section 10.
